### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ozzie Farres on 1 August 2007.

The application has been amended as follows (NOTE: Only amended claims listed):

1. (Currently Amended) A reporting system including at least one processor for creating a report, wherein a report definition specifies one or more prompt objects as properties of the report definition, comprising:

an inner prompt object comprising a first question to be asked of a user and at least one validation property;

an outer prompt object comprising a second question to be asked of a user and at least one validation property;

wherein the inner prompt object is nested within the outer prompt object, and wherein each of the inner and outer prompt objects is an object separate in object oriented programming terms from the report definition in which it is contained such that each of the inner and outer prompt objects is useable more than once in a single report definition or is useable in more than one report definition and answers to the prompt object are storable in association with the prompt object for later retrieval; and

wherein execution of the report definition creates a report, wherein the report definition contains instructions for creating the report.

16. (Currently Amended) A nested prompt object in a computer-readable medium, wherein the nested prompt object is used in creating a report definition to be executed in a reporting system, wherein the report definition specifies a prompt object as a property of the report, the nested prompt object comprising an outer prompt object that comprises:

a question to be asked of a user;

at least one validation property;

wherein at least one of the question and the at least one validation property is defined by an inner prompt object; and

further wherein each of the inner and outer prompt objects is an object separate in object oriented programming terms from the report definition in which it is contained such that each of the inner and outer prompt objects is useable more than once in a single report definition or is useable in more than one report definition and answers to the prompt object are storable in association with the prompt object for later retrieval; and

further wherein execution of the report definition creates a report, wherein the report definition contains instructions for creating the report.
